

DHI— 35 Years and Counting!

This year marks the 35th anniversary of the creation of DHI through the merger of NBHA and ASAHC. If you look at how far back our industry's history goes, 35 years seems like a truly insignificant space of time. But look at how much has changed just in the 10 years that have passed since we celebrated our 25th anniversary in 2000.

In the last ten years, DHI has completely revamped its education program, revitalized chapters across the continent, brought national education to local chapters, developed and successfully launched the Fire and Egress Door Assembly Inspector program, taken all of our member communications digital, created a bi-weekly industry e-newsletter, expanded the Foundation and began lobbying efforts on Capitol Hill, and redesigned the DHI web site to enable members to access education and other resources any time, day or night.

Seeing how much your tireless efforts and support have accomplished over the past ten years should help you feel hopeful and excited for what the next ten years will bring to this industry!
