Thursday--Saturday
8:00 am – 5:00 pm

How Much: \$500.00
for all 3 days (includes lunch)
(more than half off National Classes)

What: **COR113**
Architectural Hardware and Applications
(24 Hours) (72 CEP points)

Where: **Stanley Black & Decker – Center for Learning & Innovation**
Indianapolis, IN

To be successful in our industry you need to have a well-rounded, general knowledge of the multitude of items used every day. Many hardware items can be employed in more than one application and knowing which application is correct for a particular opening will make you indispensable to your customers and clients. Assortments of samples are utilized in this course to help you identify and describe many of the hardware items in use today. This course will also give you an understanding of proper applications and use of architectural hardware items that will be an important step in your development as a professional in the architectural openings industry.

You will learn how to:

- Size special-purpose hinges (e.g., wide throw)
- Use raised-barrel hinges
- Use swing-clear hinges
- Select proper strike plates
- Size push/pull bars
- Resolve closer/overhead stop/holder conflicts
- Size thresholds and saddles

NOTE: Students are required to bring a calculator.

Great primer class for new employees!

Required course for those seeking their AHC!!

72 Continuing Education Points!!!

Please contact Laura Frye, AHC, CSI, CCS at Laura.Frye@sbdinc.com or Lfrye@hughes.net if you have questions regarding the class.
